

Parents Teacher Association

The PTAs have gradually gained strength due to emerging educational and social demands of the parents, teachers, school management and above all, community and society which we are an integral part. The PTAs help in creating better understanding among the teachers and parents. Thus it is only by the united and well coordinated efforts of the teachers and parents that the school can be made a better and useful institution of learning.

Amrit Indo Canadian Academy has also instituted a PTA which is holding its meetings regularly and giving the expected results. In this way we are determined to make education more effective, purposeful and meaningful.
