 2. To show that light travels in a straight line.
 3. To find out the reflection of light.
 4. To check that shadow always obtained on opaque screen.

MAY

Chapter No. 7: Getting to know plants

Types of plants- herbs, shrubs, trees, creepers, climbers

Parts of plants and their specific functions, types of root system, venation- reticulate and parallel,

Flower- structure, parts, functions and pollination.

- Activities:**
1. To study difference between herbs, shrubs, trees, creepers, climbers.
 2. To dissect flower and leaf to study its parts.
 3. To demonstrate the presence of starch in a leaf
 4. To show that roots help in absorption
 5. To show that stem helps in conduction of water upwards.
 6. To demonstrate the process of transpiration.
 7. To study T.S. and L.S. of ovary.

Chapter No. 8: Body movements

Skeletal system, types and number of bones, types of joints and examples, body movements of different organisms- snail, earthworm, fish, snake

- Activities:**
1. To check the different body parts in animals helping in movement.
 2. To study types of bones from human skeleton.
 2. To count the number of bones in a vertebral column with the help of an X-ray.

JUNE

Summer vacations

JULY

Chapter No. 6: Changes around Us

Types of changes- slow and fast, physical and chemical, reversible and irreversible changes, changes due to contraction and expansion

Activities: 1. To study the difference between physical and chemical changes by checking the formation of curd, burning of fuel, cutting of paper etc.

Chapter No. 10: Motion and measurement of distances

Rest and motion, types of motion- rectilinear, circular, periodic, non- periodic, SI units of measurements

- Activities:**
1. To measure the length of the table with hand.
 2. To measure the length of classroom with footsteps.
 3. To measure the length of a curved line with the help of cotton thread.

Chapter No. 12 Electricity and Circuits

Sources of electricity, conductors and insulators, electric circuits- open and closed, electric switch, torch structure

- Activities:**
1. How to connect a bulb with an electric cell?
 2. To find out whether the materials are conductor or insulators.
 3. To make open and closed circuits by using switch.
 4. To make a torch bulb.

WEEKLY TEST SCHEDULE AND SYLLABUS

23-10-2019 Chapter No. 3: Fibre to fabric

4-12-2019 Chapter No. 4: Sorting materials into groups

Chapter No. 5: Separation of substances.

OCTOBER

Chapter No. 3: Fibre to fabric

Sources of plant and animal fibres, necessary conditions for cotton cultivation, process of making cotton- ginning, spinning, weaving, knitting and jute cultivation.

Activities: 1. Collect cuttings of different fabrics to check the water absorbency, strengths and stretchability .

2. Draw an outline map of India and indicate various Indian States where cotton and jute is grown.

3. Paste a colourful hand-woven pattern in the practical notebook.

Chapter No. 4: Sorting materials into groups

Need for classification, properties of matter- hardness, appearance, solubility, roughness, floatation, transparency.

Activities:1. To test the solubility of solids in water.

2. To test the solubility of liquids in water.

3. To identify lustrous materials, transparent, translucent, opaque objects and the materials which float or sink.

NOVEMBER

Chapter No. 5: Separation of substances

Methods of separation- hand picking, threshing, winnowing, sieving, sedimentation, decantation, filtration, evaporation, condensation, solubility: saturated and unsaturated solution.

Activities: 1. To separate chalk powder dissolved in water by using filtration technique.

2. To separate clear water from muddy water by sedimentation and decantation.

3. To study winnowing, centrifugation methods in the classroom.

4. To study evaporation technique to separate salt from sea water.

Chapter No. 9: The Living Organisms and their surroundings

Habitat- Types, adaptations- terrestrial, grasslands, deserts, mountains, aquatic, oceans, freshwater, acclimzation, biotic and non-biotic components

Activities: 1. Make a collage on the habitat of different animals.

2. To observe the characteristic features of terrestrial and aquatic animals.

3. To study adaptive features of desert plants and animals with the help of specimen.

Chapter No. 15: Air around Us

Atmosphere, composition of air, respiration and photosynthesis, importance of air

- Activities: 1.** To study the presence of air inside the glass.
2. To examine that air contain dust particles and water vapours.
3. To check that air contains various gases such as oxygen, carbondioxide and nitrogen.

DECEMBER

Chapter No. 13. Fun with magnets

Types of magnets: natural and artificial magnets, magnetic and non magnetic substances, properties, north and south pole, how to make a magnet, how magnet can lose its properties

- Activities: 1.** To study how to locate the poles of a magnet.
2. To check the effect of magnet and a paper clip in the air.
3. To study the conversion of piece of iron into magnet.

Chapter No. 14 Water

Sources and importance of water, water cycle, drought and floods, rain water harvesting

- Activities: 1.** To study the rate of evaporation on heating.
2. To observe method of condensation.
3. To check the total water used by the family and different strategies to conserve it.
4. Make a model of rainwater harvesting.

Chapter No. 16 Garbage In and Garbage Out

Types of waste- biodegradable and non- biodegradable waste, management: compositing, vermi-compositing, recycling, landfills, incineration, disadvantage of plastics

- Activities:**
1. To estimate the total solid waste generated by the whole family and its reducing strategies.
 2. How to make a compost pit and study the vermi-composting.
 3. To check the preparation of recycled paper.
 4. To study ill effects of incineration.
