

App Innovators

Club project spotlights :

Students have creatively designed Product Expiry Tracker and Shopping List App to make daily life easier and safer. Tracker helps users to remind before items expire and shopping list helps to note items.

Student Voices :

Students shared that working on these apps helped them understand real-life problems and think of practical solutions. They enjoyed learning how technology can reduce waste and daily tasks easier. These projects also improved their teamwork, creativity and confidence.

Project Goals: Create an app that help users to track product expiry dates easily. To create an organised shopping list for daily needs.

Process/ Steps: Students identified a real-life problem, planned app features, designed a user-friendly interface, developed app and tested its functionality.

Skills Learned : Students developed problem-solving and critical thinking skills. They enhanced their creativity, managed time effectively.

Challenges and solutions :

Students faced difficulties in app logic, handling data storage and fixing bugs. These issues were resolved through regular practice, guidance and testing app. multiple times.
