Canva Creators Club

Student Voices :

Students learned how to create videos using Canva. They explored different video templates and learned to add pictures, text, music, animations, and transitions to make their videos more attractive. These hands-on activities encouraged students to express their ideas creatively, develop digital skills, and gain confidence in creating and editing videos using Canva.

Project Goals:

- To develop creativity through video making.
- To learn video creation and editing using Canva.
- To use pictures, text, music, and animations.
- To express ideas through creative videos.

Process/ Steps:

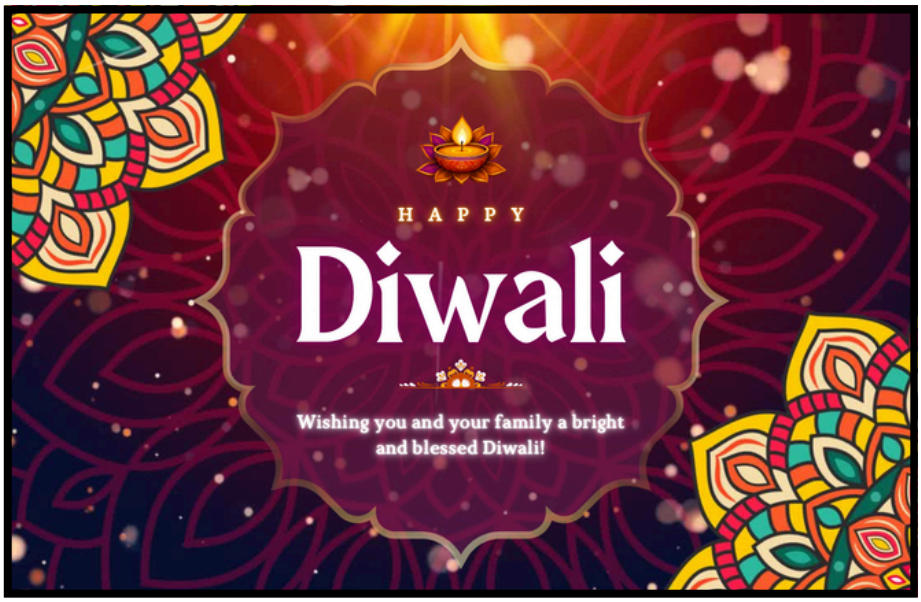

- To develop creativity through digital video designing.
- To learn video creation and editing using Canva.
- To use pictures, text, music, and animations.
- To express ideas through creative videos.

Skills Learned :

- Canva video-making skills
- Creativity and content selection
- Image, text, and music arrangement
- Digital video presentation skills

Challenges and solutions :

Students faced some difficulty in selecting suitable video templates, adding elements, and arranging pictures, text, and music. With teacher guidance and practice, they learned to use Canva tools effectively and improved their video-making, creativity, and digital presentation skills.
