

Club project spotlights :

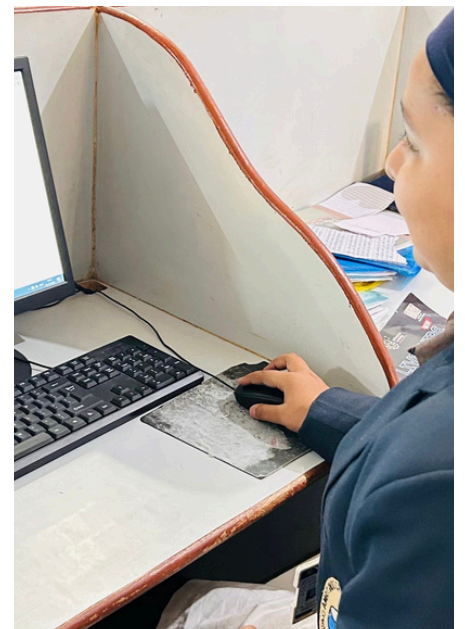

To learn how to display data in a tabular format using HTML. Students created tables for items in the website, student's record and product lists. This helped them understand how structured data improves readability and usability on websites.

MENU TABLE	
Every dish on our menu tells a story of flavour and care	
Item	Category
Veg Pizza	Fast Food
Panner Burger	Snack
French Fries	Snack
Butter Naan	Indian
Dal Makhni	Main Course
Panner Butter Masala	Main Course
VEG Fried Rice	Chiense
Hakka noddles	chiense
Cold drink	Beverage
Tea	Beverage

Student's name	Percentage
Rahul	35%
Ekamjot	76%
Ramesh	55.6%
Ram	47%
Ramanjot	96%
Mishti	16%

Student Voices :

Students shared: "HTML tables helped me organize data clearly on web pages. I learnt how to display information like marks, schedules, and records in a structured way. The sessions were practical and easy to understand."

Project Report and Skill Development

WebWeavers Club

Jiya budhiraja - 4/1/2026

Project Goals : Learn the basic structure of HTML tables using `<table>`, `<tr>`, `<th>`, and `<td>`. Understand how to organize data into rows and columns. Learn to add table headings for better clarity. Improve presentation of data using table borders, spacing, and alignment.

Process/ Steps : Understood the purpose of tables in web pages. Learnt basic table tags and their usage. Created simple tables for student information. Added headings using `<th>` for better structure.

Skills Learned : Organizing data using rows and columns. Using table headers for clarity. Styling tables with CSS.

Challenges and solutions :

Tables looked cluttered and hard to read. Added proper spacing, borders, and CSS styling to improve clarity and appearance.

`<table>`

<code><tr></code>	<code><td></code>	<code></td></code>	<code><td></code>	<code></td></code>	<code></tr></code>
<code><tr></code>	<code><td></code>	<code></td></code>	<code><td></code>	<code></td></code>	<code></tr></code>
<code><tr></code>	<code><td></code>	<code></td></code>	<code><td></code>	<code></td></code>	<code></tr></code>
<code><tr></code>	<code><td></code>	<code></td></code>	<code><td></code>	<code></td></code>	<code></tr></code>

`</table>`
