

## Student Voices :

Scratch makes coding fun and colourful. Scratch coding encourages creativity .Every project feels like building my own world. Coding on Scratch helps me think step by step. Scratch helped me become confident in experimenting, improving and presenting my ideas. It taught me how to debug and fix problems on my own. Working in Scratch makes me feel like a real game designer.

# Project Report and Skill Development

Code Warriors

Inderpreet Kaur 05/12/2025

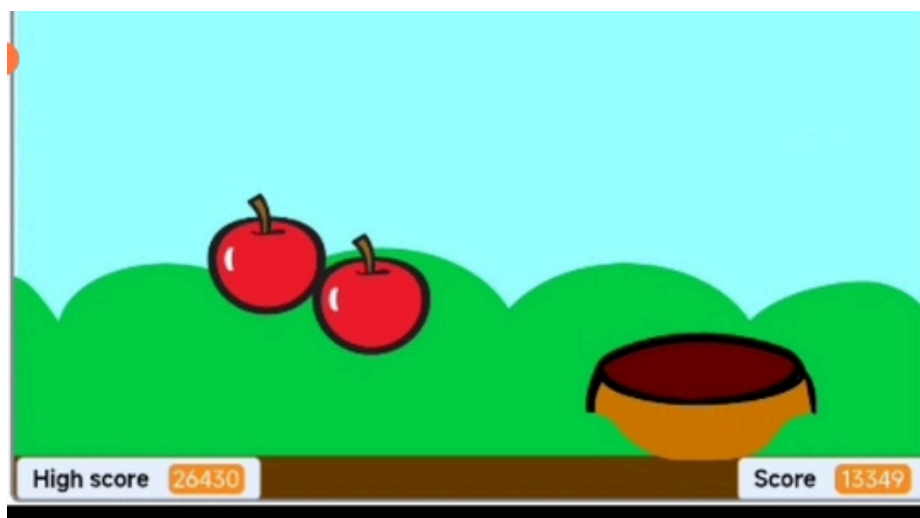

**Project Goals:** The goal of this Scratch project is to use imagination to create interactive and visually appealing projects.

**Process/ Steps:** Scratch make learning joyful by combining creativity and technology. Use different tools like brush, fill, shape, eraser etc to design sprite.

**Skills Learned :** Using Scratch 's paint editor user learn how to use tools properly. By making different costumes user understand how character move and change expressions.

**Challenges and Solutions :**

**Challenge:-** Accurate drawing is difficult, sometime size may vary and edges look messy **Solution:-** By using Outline tool, resize handles and clean the small parts carefully we are able to get result.
